

How Much Does It Cost to Create an App?

SURVEY : MOBILE APP DEVELOPMENT COST AND TIME

Want to create an app like Tinder, WhatsApp, Instagram, Uber? See how much does it cost to build an app with the help of GoodFirms below research.

Research: How much does an app cost in 2018?

In the mobile application world, new ideas are often alteration and iteration of already existing ones or a mix of thoughts picked from here and there. The mobile app development companies hear from their clients that they would like to build an app similar to XYZ app for a completely different audience fulfilling a purpose that suit their needs. Once the idea is in place, the nightmare arrives.

How to find the right development partner?

How much does it cost to build an app?

How much time does it take to build the app?

The mobile development agencies, product incubation centres and technology laboratories rolling out each day come to your rescue – the talent required to build your app is abundant. Appreneurs can easily find the best mobile app development partner from our Directory section that lists down [top mobile app development companies - globally](#) based on our extensive research. This answers the first question.

Now, let's answer the second question.

Below you can find the app development cost estimate for different types of mobile apps:

- A feature-rich highly complex app like Instagram or Uber ideally **cost anywhere between \$70,000 to \$100,000.**
- Medium complexity compelling apps like WhatsApp or QuizUp most likely **cost between \$61,000 to \$69,000.**
- User-friendly app with least-functionality like Tinder or Periscope **cost anywhere between \$40,000 to \$60,000.**

This is just a rough estimate. To help potential app clients find detailed answers to app development cost and time question, GoodFirms have conducted multiple surveys across the app landscape. Based on this comprehensive research, we present the app development cost breakdown and time investments to create apps that have similar functionalities to world's hottest mobile applications.

Uber

Uber is a mobile application that connects passengers to drivers who require vehicles for hire. The app works on the simple algorithm: Select the car – Notify the pickup location – Get at your destination. Once all these information is entered by the commuter, the app alerts the user about the confirmation of the ride, driver's name, car number plate, route to be taken and the estimated time to reach the destination. [more..](#)

Average Cost (in US\$) :
\$91,750.00

Average Time (in months) :
5.76

The basic features offered by the app are listed below:

User / Commuter Application

1. Sign Up / Login and Manage Profile
2. User Profile
3. Pick up Location / Drop off Location
4. Contact Driver
5. Map View
6. Payment Method
7. Cancel the Trip

Driver Application

1. Sign Up / Login and Manage Profile
2. Driver Profile
3. Accept the Ride and Navigate to Destination
4. Trip Completion Status
5. Trip Cancelled
6. Trip Fare
7. Payment Received

Additional / Unique Highlights

The **new features** that can be added to a mobile application are as follows:

Driver Based Application

1. Music Integration - play favourite songs of the passenger
2. Better UX
3. Short and Better Routes
4. Tablet Support
5. Geo Tracking
6. Chat With Passenger
7. Rate the Passenger
8. User / Commuter movement from the booked location to pickup location
9. Connection with PayPal or similar service that handle the payment of the driver
10. Details about the passenger to report any emergency
11. Facility for Driver to report if the passenger is abusive or exhibits inappropriate behaviour

User / Commuter Based Application

1. Cash Support
2. Select favourite drivers based on past feedbacks /ratings
3. Better UX and UI
4. Tablet Support
5. Geo Tracking
6. Chat with Driver
7. Real Time Traffic Updates
8. Dynamic pricing would be implemented to adjust pricing depending on the demand in the area at a certain time
9. Option to share drives with other customers for a lower price based on their routes
10. Alert the commuter if the Driver takes alternate route

Conclusion

Application	Average Cost (in US\$)	Average Development Time(in months)	Number of Participants
Tinder	\$43,955.60	3.8	43

Periscope	\$64,557.10	4.39	33
WhatsApp	\$71,157.10	4.74	34
QuizUp	\$70,983.90	4.85	29
Instagram	\$76,828.60	4.87	33
Uber	\$91,750.00	5.76	34

The details provided above will give you a rough sketch of the cost of creating an app similar to popular mobile apps like Periscope, Instagram or Whatsapp. It has been observed that online app cost calculator does not provide the exact iOS app development cost or Android app development cost. So the only best way to know the approximate cost of developing an app is to obtain a quote range from several app development companies. The next step is to pick the best firm from these companies that suit your budget and app requirements.

Make an app within your budget by selecting the right app creator firm from the GoodFirms map of [top Android app development companies](#) or [top iOS app development companies](#).
