FAQs

- ⊕ Which offer should I choose?
- ⊕ How does the free trial work?
- ⊕ Can I use Ringover's phone system in a small business?
- ⊕ How long will it take to set up my phone system with Ringover?
- ⊕ Is there unlimited calling?
- ⊕ Is Ringover GDPR compliant?
- ⊕ Can I keep my existing number?
- ⊕ My team uses a CRM, can I sync it with Ringover?
- ⊕ Who can I call with a VoIP number from Ringover?
- ⊕ Do I need to purchase new devices for my employees to use Ringover?

Which offer should I choose?

Select the plan that suits your needs!

SMART provides all of the classic business phone features and allows you to equip all of your employees with direct dial lines. It also includes a cloud switchboard system and main reception number. This is the ideal offer for any company of any size to set up a complete business phone system that's ultra-simple to implement and utilise on a day-to-day basis.

POWER offers more advanced professional phone features such as advanced call routing, detailed statistics, and tools for extensive calling, enabling live call supervision and coaching. This option is ideal for creating or reinforcing a high-performance call centre - whether for sales or customer support — without any technical expertise requirement.

How does the free trial work?

You can test our SMART plan free of charge for 7 days. During the trial, you will have direct phone numbers for your employees as well as the main reception number and the possibility of setting up a cloud phone system.

The free trial allows up to a maximum of 3 users and includes 120 minutes in outbound calls. You can exceed these limits at any time and switch your free trial to a paid subscription.

Can I use Ringover's phone system in a small business?

Yes, Ringover is an all-in-one-app that is very easy to use and manage. It is perfectly designed for small businesses to set up and use without unnecessary hassle or burden.

How long will it take to set up my phone system with Ringover?

With Ringover, it takes only a few minutes to properly configure your cloud phone system. Choosing your number and adding your employees is a 1-click process and with our user-friendly online studio, you can easily configure your voice messages and greetings in a few seconds. The phone setup is designed to be completed independently. No technical expertise or specialised support required.

Is there unlimited calling?

All inbound calls are free. Unlimited outbound calls are included in 75+ destinations such as the US, Europe and Asia. For specific outbound calling rates, see the price list here.

Is Ringover GDPR compliant?

Yes, we are fully compliant with GDPR and all data centres storing the data necessary for the provision of Ringover services are hosted and located in France, therefore no data is transferred out of the European Union or European economic area. For more information on GDPR please visit here .

Can I keep my existing number?

Yes, we can port over your landline, mobile numbers and most toll-free phone numbers. Porting fees are included in your contract.

My team uses a CRM, can I sync it with Ringover?

Of course, we've built native integration with 15 + popular CRMs eg.... You can even sync Ringover with your custom built CRM using our APIs and webhooks. Check out our developer resources here .

Who can I call with a VoIP number from Ringover?

Any telephone number whether landline, mobile or toll free. It's just like using a sim card number...

Do I need to purchase new devices for my employees to use Ringover?

No, Ringover is 100% BYOD-friendly so it works on any smartphone, most desk phones, PC etc.
