Frequently Asked Questions

Can I try the DrapCode builder for free? ▼

Yes, you can start building your no code/low code web apps on DrapCode using any of our Paid plans. However, there are some of the advanced features, such as team member collaboration, custom SSL certificate, code export, etc. that you can't use under the basic plans.

Can I collaborate with others on a project in DrapCode? ▲

What makes DrapCode better than other no code? ▲

Can I upgrade or downgrade my subscription plan later ▲

Can I transfer my DrapCode projects from my account to another account? ▲

Is there any set limit on the number of projects one can undertake or create on his/her DrapCode account? ▲

Can I add custom features in my no code web app? ▲

Can I use a custom domain by changing the default domain name of my no code app? ▲

Is exporting code in DrapCode free? ▲

Can I edit the source code exported from DrapCode in some other code editor? ▲

In which format does the source code get exported? ▲

If I host my web app externally, do I have to provide any attribution to DrapCode? ▲

Do I have to pay DrapCode's subscription fee even after exporting the source code of my app? ▲

Where can I deploy the exported source code from DrapCode? ▲

What is counted as a web page? ▲

What is vCPU in the server capacity?

Since several web apps are running on a shared server, so does it impacts the performance of other applications?

What is the difference between a Shared and Dedicated server?

Will DrapCode maintain my web app after deploying it on my server?

What will happen if DrapCode Shuts down?
