How it works?

- We charge per number of users that use your target application
- Create unlimited number of Journeys & Tips
- Newired Editor is for free, anyone can create Journeys & Tips.
- Enterprise ready security, deployment options and customizability

Who is the user?

For Newired, there is just a very small difference between internal application users and external portal users. So we count as a user:

- Every registered user of each single corporate application where Newired is deployed on, either internal or SaaS.
- Every weekly unique visitor (as defined in common analytics) to a public available application, website or portal.

Example: if you wish to have Journeys & Tips for your 200 registered users in Salesforce, 450 in Workday, 200 in your internal custom app, plus 1000 weekly users on your portal, you need a license for 1.850 users.

Benefits

- Easy and transparent pricing
- Future proof calculation – no surprises
- Discount structure based on the number of end users
- No charge for server, portal and editor components (you don't pay to create the content)
- Scalable, you pay what you really need with low investment at start-up
- Compelling corporate discount structure for large enterprises with multiple applications
- Delivery On-Premise (Server & Private Cloud), Public and Hybrid Cloud
- Set-up services and hands-on training included in the subscription fee
- OEM licensing available: to integrate and distribute Newired content with your application

FAQs

▶ Shall I purchase different licenses to deploy Newired on test environments and live on the target application?

▶ Do I have a limit of Journeys or Tips I can create?

▶ How many Journey creators can I have comprised in the license?

▶ If a user uses two or more applications, how do we count this?

▶ Is hosting included in the subscription fee?
