- When chargeable functions are used in scenarios *other than* using API or wel
  using credits. For example, credits are deducted from your account to cover
  the Coze platform.

The following table lists the capabilities that are in charge at present.

Charges	Description
Model Charge	Coze provides a diverse set of models with different capabilities, language understanding, and complex question answering. Depending on the way that you are using the model, either Coze deducted from your account.
Plugin Charge	Coze provides various official plugins to facilitate AI application d You will be charged only when certain plugins are used. Dependir using the plugin, either Coze tokens or credits are deducted from

Coze token deduction (API/Web SDK)

The Coze token is a settlement resource that you can purchase from Coze. Coze
plugin charges incurred when using the Coze API and Web SDK.

The following table lists the APIs that may consume Coze tokens.

> **Note**
>
> Each Coze account is granted 30 free API calls and 100 Web SDK calls. If there
> listed APIs will be affected. For more information on purchasing Coze tokens, s

Credits deduction (Usage other than API/Web SDK)

Credit is another settlement resource that you can purchase from Coze. Credits
incurred in scenarios other than the Coze API and Web SDK.

The calculation for the deducted message credits is as follows:

Deducted credits = Number of model calls × model price + Number of plu

- **Model and plugin calls**

    A single conversation or workflow may involve multiple model calls or official
    configuration, such as in scenarios with function calls, or workflows configure
    nodes.

    You can view the number of model and plugin calls for each conversation in t
    actions may trigger calls to models or plugins:

    ◦ agent or app test

    ◦ A workflow test

    ◦ An executed scheduled trigger

    ◦ An executed shortcut command

- **Model price**

    The number of credits varies by models as listed in the following table.

Models	Credits consumed per call
GPT-3.5 Turbo	0.1
GPT-4o mini (128k)	• Coze free plan：1 • Coze Premium：0.1

GPT-4o (8k)	2
GPT-4o (32k)	3.5
GPT-4o (128k)	5
GPT 4 Turbo(128K)	5
Gemini 1.5 Pro	2.5
Gemini 1.5 Flash	0.25
Claude 3 Haiku	0.1
Claude 3.5 Sonnet	2
o1-mini	2.5
o1-preview	12
DeepSeek-R1	3
Deepseek-R1-Distill-Qwen-32b	2
DeepSeek-V3	2.3
Skylark-lite	0.05
Skylark-pro	0.1

Test or chat with an agent or app

When testing an agent or app on the Coze platform from the **Preview** panel, or c
Store, Discord, Telegram and other channels, credits will be deducted from your
model calls and the model the agent or app uses.

Test a workflow with LLM node

If a workflow is configured with model or plugin nodes, credits will be deducted
workflow in the workflow editor.

The deduction is based on the number of test runs and the model or plugin the w
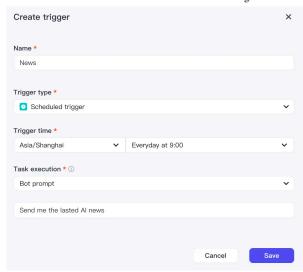

> **Note**
>
> The Coze platform offers each account 10 free workflow trial runs per day, duri
> charged. After the free quota is exhausted, credits will be deducted based on t

Scheduled trigger with prompt

If a scheduled trigger is configured with a model or plugin, credits will be deduct
event is triggered.

The deduction is based on the number of triggered events and the model the ag

- If this scheduled task is triggered in multiple channels, each channel will be c from the agent or app developer's account.

> **Note**
>
> No credits will be deducted if this scheduled task is triggered in Coze Store

- If this scheduled task is triggered by end users, the credits will be deducted f **message billing settings option** enabled.

Shortcut commands

If a shortcut is configured for an agent or app and the shortcut uses a model or your account every time the agent or app users use the shortcut command.

The deduction is based on the number of executed commands.
