- ✓ Dedicated onboarding

Choose Scale

Best value per vehicle

Enterprise

UNLIMITED VEHICLES

\$6,990

one-time license

Full ownership with no vehicle ceiling. Your infrastructure, your rules.

- ✓ Unlimited vehicles
- ✓ Full platform features
- ✓ Self-hosted deployment
- ✓ 1 year of dedicated support
- ✓ Custom SLA available

Talk to Sales

Includes custom onboarding

All paid plans include 1 year of updates & support. Prices in USD. No recurring license fees.

WHAT'S INCLUDED

What ownership actually means

Every plan delivers the same platform. No feature gating, no artificial limitations — just the vehicle range that fits your fleet.

Full source ownership

Self-hosted deployment

You receive the complete platform. No third-party code, no license keys that expire, no runtime phone-home checks.

Run on your own servers, your own cloud, or your own data center. You control the infrastructure from day one.

Unlimited updates for Year 1

All platform updates, patches, and new features released during your first year are included at no extra cost.

No per-vehicle recurring fees

Your license covers the vehicle range you purchased. Add vehicles within your tier without additional charges.

Complete data sovereignty

Your tracking data never leaves your infrastructure. No shared tenancy, no third-party data access.

Production-ready architecture

Enterprise-grade codebase with real-time tracking, geofencing, alerts, reporting, and API access built in.

WHY THIS MODEL

Recurring SaaS vs. One-Time Ownership

Most tracking platforms charge monthly and hold your data hostage. Open VTS gives you permanent infrastructure you control.

01

You are not renting software

Traditional SaaS charges you monthly for access to someone else's servers. When you stop paying, you lose everything — data, configuration, operational continuity.

02

You are owning your platform

Open VTS is deployed on your infrastructure. The code is yours. The data is yours. The platform runs whether or not you maintain a relationship with us.

03

You are scaling without recurring dependency

Add vehicles within your tier at no extra cost. Your third year costs the same as your second — optional support renewal means no compounding license fees.

PAYMENT MODEL

RECURRING SAAS

Monthly or annual subscription, indefinitely

OPEN VTS OWNERSHIP

One-time payment, you own the license

COST AT 3 YEARS

RECURRING SAAS

36x monthly fee — cost keeps growing

OPEN VTS OWNERSHIP

Original license + optional support renewal

DATA CONTROL

RECURRING SAAS

Hosted on vendor servers — shared or managed tenancy

OPEN VTS OWNERSHIP

Self-hosted — full sovereignty, zero third-party access

VENDOR DEPENDENCY

RECURRING SAAS

Platform stops working if you stop paying

OPEN VTS OWNERSHIP

Your platform runs independently, forever

CUSTOMIZATION

RECURRING SAAS

Limited to vendor's roadmap and API surface

OPEN VTS OWNERSHIP

Full source access — modify anything you need

RECURRING SAAS

Per-vehicle charges multiply with growth

OPEN VTS OWNERSHIP

Fixed license — add vehicles within your tier at no cost

Open VTS is infrastructure you own — not a subscription you depend on.

SUPPORT & ADD-ONS

Ongoing support. Optional services.

Support is included in Year 1. From Year 2, it becomes an optional renewal. Add-ons are independent professional services — not hidden fees.

INCLUDED

Year 1 Support

Year 1 support is included with every paid plan.

- ✓ Platform updates and new features
- ✓ Security patches and bug fixes
- ✓ Priority email and ticket support
- ✓ Onboarding assistance

OPTIONAL

Year 2+ Renewal

From Year 2, annual support is available at 18–22% of your original license fee. Your platform continues to run without renewal — this is for continued updates and direct support.

- ✓ Continued platform updates
- ✓ Security patches

✓ Direct support access

Open VTS
version migration assistance

18–22% of original license fee / year

Example: Scale plan (\$3,990) → Year 2 support at ~\$718–\$878/year.

Professional add-ons

Optional services scoped per engagement. Not bundled, not required.

Managed Deployment

Our team deploys Open VTS on your infrastructure — server setup, configuration, SSL, and production readiness.

Data Migration

Seamless migration from your existing tracking platform. Historical data, device mappings, and geofences transferred.

White-Label Applications

Custom-branded mobile and web applications with your identity, logo, and domain — ready for your customers.

Add-on pricing is scoped per engagement. [Contact us](#) for a quote.

FAQ

Common questions about pricing

Clear answers about the ownership model, support, upgrades, and what you actually pay for.

Is the payment really one-time? ^

Yes. You pay once for your license tier and own the platform outright. There are no recurring license fees, no monthly subscriptions, and no per-vehicle charges within your tier.

What happens after Year 1? v

Is support included in the first year? v

Can I upgrade to a higher plan later? v

What do the add-ons cover? v

Which plan is best for me? v

Do I need to self-host? v

What if I stop renewing support after Year 1? v

What infrastructure do I need? v
