

Free forever — no credit card required. Predictable, capacity-based pricing: one price per tier, no per-call fees, no credit expiry. Every paid plan includes the full API, signed webhooks, and all extraction methods. You upgrade for more capacity, never to unlock features you were already promised.

Proxy bandwidth	–	50 MB	500 MB	5 GB
API access	Read-only	Full	Full	Full
Node.js SDK	✓	✓	✓	✓
Signed webhooks	✓	✓	✓	✓

Frequently asked questions

Is there a free trial for paid plans?

What counts as an LLM extraction?

No timer. The permanent free plan is a real budget — 5 monitors, daily checks, 50 LLM extractions/mo. Build on it as long as you want and upgrade only when you outgrow it.

Can I cancel anytime?

Yes. Cancel from billing settings at any time; you're moved to the free plan with no penalty.

What extraction methods are supported?

CSS selectors, XPath, JSONPath, regex, full-page hashing, and LLM extraction. All methods work on every plan.

Each time a monitor run uses the AI/LLM extractor it counts as one call. Results aren't re-billed if the page hasn't changed.

What is proxy bandwidth for?

When a site blocks standard scrapers, Verid routes through its residential proxy network. Bandwidth is only consumed when that layer is activated.

How is webhook delivery handled?

Immediate attempt, then up to 6 retries with exponential backoff (5m, 15m, 30m, 60m, 2h). Failures are visible in your dashboard.
