Built on strong foundations

But strong foundations

Stacked with features because we built HarperFlow to use on our own sites. If something is missing, it's already moving through the pipeline.

Opportunity Discovery

Finds high-intent topics your customers are already asking search engines, AI assistants, and competitors.

Content Calendar Automation

Turns approved opportunities into a publishing rhythm without another spreadsheet or editorial chase cycle.

Source-to-Snippet Hooks

Builds concise, source-backed passages designed to be lifted, quoted, and reused by AI answer engines.

FAQ Blocks For Every Article

Includes structured FAQs that capture long-tail questions and give AI engines cleaner answer targets inside articles.

Featured Image Generation

Creates relevant article visuals and alt text so every published post feels complete inside Webflow.

SEO-Optimised Author Cards

Adds bylines and author context that support credibility, presentation, and on-page article completeness.

AI-Search Gap Scanning

Spots answer gaps where your site can become the source AI engines quote before competitors.

Sixteen Article Formats

Matches each topic to the right format, from answer pages to comparisons, checklists, and deep dives.

Citation Architecture

Connects claims, sources, FAQs, and summaries into a cleaner trail for readers and AI engines.

Styled Content Callouts

Highlights key ideas, warnings, summaries, and proof points with polished blocks inside the article body.

SEO Metadata Generation

Generates titles, descriptions, slugs, summaries, and keyword fields for each published article on Webflow.

Article Themes Included

Applies polished article themes so automated posts feel native, styled, and ready to publish instantly.

Topic Cluster Planning

Groups articles around connected themes, so your blog builds authority on specific topic clusters.

Brand Voice Memory

Keeps articles aligned with your positioning, audience, tone, product rules, and content pillars every time.

TL;DR Takeaways

Adds punchy article takeaways that make long-form content easier to scan, remember, and cite quickly.

Rich Article Formatting

Publishes clean headings, lists, tables, FAQs, citations, visuals, and structure without Webflow formatting work.

Internal Link Creation

Finds natural internal linking moments so new articles strengthen the wider content library over time.

33-Field CMS Structure

Maps article content into a purpose-built Webflow structure for SEO, FAQs, media, and metadata cleanly.

Questions before you turn your blog into a growth engine?

Here are the answers to the things most businesses ask before using HarperFlow to publish researched, source-backed GEO articles on their Webflow site.

What does HarperFlow actually do?

Is HarperFlow just another AI writing tool?

How do I know the articles are high quality?

What platforms does HarperFlow support?

Will HarperFlow publish without me knowing?

How is pricing structured?

HarperFlow researches, writes, and publishes source-backed GEO articles for Webflow sites, helping your blog earn AI-search demand without the CPC burn.
