

NO SUBSCRIPTION

# Pay once. Credits never expire.

Transcription, AI voiceovers, voice cloning, and music generation, one credit balance, starting at just \$4.99.

See pricing →

What credits buy

### Transcription

Turn audio and video into accurate, editable text (up to 2 hours per file).

from 25 credits →

### AI voiceovers

Generate natural, expressive narration from a script in seconds.

50 credits →

### Voice cloning

Create a custom voice from a short sample and reuse it anywhere.

350 credits →

### AI music

Generate original background music for videos, reels, and content.

10 credits →

#### SIMPLE USAGE

## What credits actually buy

One balance, four tools. Spend it however your work needs.

|                                                                       |             |
|-----------------------------------------------------------------------|-------------|
| <b>One AI music track</b><br>Background music for a reel or short     | 10 credits  |
| <b>One transcript, up to 1 hour</b><br>A podcast episode or interview | 25 credits  |
| <b>One transcript, up to 2 hours</b><br>A long meeting or lecture     | 75 credits  |
| <b>One AI voiceover</b><br>Narration for a product demo or tutorial   | 50 credits  |
| <b>One cloned voice</b><br>A reusable, branded voice for your channel | 350 credits |

## Choose your pack

Every pack shares the same tools. Bigger packs unlock a bigger bonus — never a worse rate.

|                                                                                                                                                                                                                                |                                                                                                                                                                                                                                |                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                  |

All packs share the same tools — transcription, AI voiceovers, voice cloning, and music generation. Credits are added instantly and never expire.

#### PLAN COMPARISON

## Full breakdown by pack

Exactly how far each pack goes, tool by tool.

| ACTION                                         | FREE | STARTER | CREATOR | STUDIO |
|------------------------------------------------|------|---------|---------|--------|
| <b>Music generation</b><br>10 credits          | 20   | 60      | 300     | 1,300  |
| <b>Transcription, up to 1 hr</b><br>25 credits | 8    | 24      | 120     | 520    |
| <b>Transcription, up to 2 hr</b><br>75 credits | 2    | 8       | 40      | 173    |
| <b>AI voiceover</b><br>50 credits              | 4    | 12      | 60      | 260    |
| <b>Voice cloning</b><br>350 credits            | 0    | 1       | 8       | 37     |

### Need more credits later?

Top up anytime from \$4.99, at the standard rate — no expiry, no commitment.

100 credits / \$1

#### CREDIT SUPPORT

## Pricing FAQ

Everything you need to know before choosing a credit pack.

### How does the AudioScripter credit system work?

AudioScripter uses a transparent, pay-as-you-go credit model based on an exchange rate of **\$1 = 100 credits**. Instead of paying separate subscriptions for multiple audio tools, your purchased credits can be used flexibly across transcription, text-to-speech, AI voice cloning, and AI music generation.

### Do my purchased credits expire?

### What exactly do credits buy across the tools?

### Can I try AudioScripter before purchasing a pack?

### Which credit pack is right for me?

### What happens if I run out of credits mid-project?

### Are there any hidden fees or recurring monthly charges?

### Which payment methods are supported?

AudioScripter

AI audio workspace

Transcribe recordings, generate natural voiceovers, clone voices with consent, and create royalty-friendly music from one focused platform.
