Tickets/Daily Observation

Report unsafe acts or daily site observations instantly. Log issues on the go to ensure every hazard is documented and resolved by teams.

- ✓ **Ticket:** Track incident reports and location counts.
- ✓ **Daily Observation:** Log unsafe acts and monitor fire
- ✓ **Evaluations:** Monitor contractor and safety equipment

Our system not only enables real time visibility of assets at an enterprise level but also truly enables our clients to get better reporting on asset assignment, movement and financial status of all assets throughout the organization.

JUST SCAN AND GET THE STATUS UPDATE

Our simple yet comprehensive asset tracking system works on PCs, Android based enterprise mobile computers as well as smartphones and tablets. We offer a turnkey solution that includes software, integration, readers, tags for various assets, tag printers & programmers as well as implementation services. Our system enables live time tracking of assets through our BI based dashboards customized to your operational requirements. We offer integrations with ERPs and financial systems as well as the tools to generate simple yet insightful reports.

Advantages Overview

- Industry specific business consultation
- Increase efficiency with faster tracking
- Real-time asset value visibility
- Reduce the loss or theft of portable assets
- Department and vendor management
