

Pricing

Priced by fleet size, not by feature. Every edition ships the same product – what changes between them is how many vehicles and users it carries.

Bookings and document scans are monthly allowances. Bookings are capped on the free edition only.

Yearly is charged at ten months, so two months are free on every paid edition.

Free is a tier, not a trial. It does not expire, needs no card, and carries every feature on this sheet within its capacity.

Card payments run through the operator's own Stripe account and Renviq takes no percentage of them. The subscription is the whole cost of the software.

Not included on any edition: a native mobile app, telematics or GPS tracking, card-terminal integration, an accounting ledger. Government reporting covers Spain and Italy only.
